DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear as to which plane the "geometry" is being claimed in. The plane wherein the ends extend should be clearly claimed. However, the claims, as best understood, have been examined on their merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Speelman (4384583).

Speelman discloses the elastic strap member 10 with the middle, left and right ends with the hook and loop fastener means 16,18 on the ends. When the ends are connected and folded on top of the middle section the left and right end portion project upwardly away from the middle as broadly claimed. When Speelman et al strap is placed about clothing straps the clothing straps would be drawn together as broadly

claimed. (See Speelman et al, figures 1 and 3). Figure 3 shows the transverse width 20 as claimed. Claims 17-19 are not clearly claimed in that applicant has not claimed the dimensions with in the appropriate plane. The preamble has not been given patentable weight since no structure has been claimed that distinguishes the elastic strap as extending about clothing straps. The clothing strap tensioning device should be claimed in combination with garment straps and also the geometry should be claimed in the plane of the present invention.

Claim 21 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

None of the cited references, alone or in combination, disclose the strap connector with the shape as claimed in claim 21.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
